

Process Flow Chart C – Our Process

The public and those effected by these processes can influence the other processes to some degree.

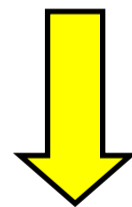

Show political parties that their party policy must reflect the public's opinion on issues such as CSG, Mining, Agriculture.

Form a group in your area and be vigilant with up coming projects, applications, environmental impact statements—make submissions.

Contact the Ministers responsible for the specific areas of interest and ensure they are aware of the issues you consider paramount regarding the project

Raise public awareness of the impending activity gather support

If the project is already operational,

Form a group, obtain relevant documents, EIS, EA.

Become familiar with the requirements of those documents and communicate with the company and the ministers responsible of areas where company compliance with these requirements are failing and

Where those requirements may not be adequate to address additional impacts that are being experienced.

Raise public awareness and support.
