

Process Flow Chart D – Specific Tools

The specific tools that you and your group can use to address compliance and raise public awareness and support.

- ⇒ Form an effective community group
- ⇒ Establish baselines for air, water, land.
- ⇒ Use monitors and vigilance to measure actual impact in your area
- ⇒ Where ever possible monitor compliance for example with Weed/Seed/Pest (Biosecurity)
- ⇒ Understand the issues of health and toxicology relating to the activity
- ⇒ Understand the impacts on the land / soils / water
- ⇒ Understand your rights, enact them and be vigilant on the governments attempts to remove them.

Connect your group with other specialty groups who are able to pursue these individual issues and support your group's understanding of the matters.

In short build on the information and contacts you made today!
